Various solar industries/stock market

American Citizens-facing big changes!

Gas + oil companies; countries of the Middle East

There is a new solar energy project at Georgia Tech! The goal is to find a more economical way (the technology is very expensive) to use solar energy (which is free and unlimited) so that the U.S. can become more energy independent. This is a major political issue, for Democrats and Republicans alike! Examine this issue from at least four very different perspectives.

Directions: Put a concept or topic in the center. On each of the four sides, develop a different perspective from which that concept or topic can be viewed.
